
Terminate Button

Posted by niki - 2016/02/03 19:05

Hi,
How i need to change this code to make when user click terminate button and then system ask him: Do you like to take this quiz again and the user click No to redirect him to the home page of that specific quiz?

Hello,

See "gotopage" method in /components/com_ariquiz/controllers/terminate.php file.

Thank you.
I found this

```
JRoute::_('index.php?option=com_ariquiz&view=quiz&quizId=' . $quizId . ($ItemId > 0 ? '&Itemid=' . $ItemId : ''), false)
```

Can you tell if i can change the link the way i want? When they click "no" to redirect to different page? What are my options? What about if i want to redirect them to <http://mywebsite.com/new.html>

What will be the link?

See "Redirect URL" parameter on "ARI Quiz -> Config" page.
