
Prevent retake after passing

Posted by jinoue - 2016/02/07 04:12

Is there a way to prevent a user from retaking a quiz if they pass?

I have placed a quiz using the quizanywhere plugin into a K2 item. However, after passing the quiz and returning to the page, the quiz loads again. I would like to prevent a user that has passed the quiz before exhausting the attempt count from taking the quiz again and showing a message that the quiz was already taken and passed.

Hello,

Use "Access & Security -> Attempt count" parameter in quiz settings to limit number of attempts for the quiz.

Regards,
ARI Soft
