## Delete or update a questions

Posted by enginbasturk61 - 2016/03/26 05:54

---

Hi!

when i delete any questions from question bank, I have observed that it wont be deleted from database....

How can be deleted from database... to make our database light, we need this...

I also checked ari quiz question version in database.. with the same question id there are more than 1 questions.. why?

Hello,

The extension uses versioning for questions because a user can take a quiz with one version of question(s) after this administrator(s) can edit questions and another versions will be available in future quiz sessions. Administrators and quiz takers will see correct versions when see quizzes results.

Regards,  
ARI Soft
