
Parent menu item on mod_ariquizresult

Posted by vanilallate@gmail.com - 2016/04/15 06:10

link quiz in mod_ariquizresult (Modul) i set linked quiz but when i click quiz link showing :
/index.php/component/ariquiz/Quiz/Quiz-Name
in webpage just single page not include module.

how to change that link to parent menu.

/index.php/Menu/sub-menu

Hello,

It is possible to specify menu item ID in the parameter and this ID (as Itemid request variable) will be added to quiz link.

Regards,
ARI Soft
