
Quiz Showing Blank Page after Saving

Posted by pitkag - 2016/07/08 10:18

Hello,

I am using the one page layout for Ariquiz. When i save it shows a blank page. How are the results shown when one clicks on Save? :(

Hello,

If you want to show questions with user's answers and correct answers at the end of a quiz, open "Results settings" tab on quiz settings page and set "Show detailed results" parameter to "Always".

If want to show some text, create text template(s) on "ARI Quiz -> Text templates" page then open "Results settings" tab on quiz settings page and select text templates in "Choose template type -> Manual -> Successful template" and/or "Choose template type -> Manual -> Failed template" drop-downs.

Regards,
ARI Soft
