
Does not record username

Posted by jinoue - 2016/08/04 02:50

I am randomly getting quiz results where the user-name, user-login and user-email is not recorded and instead shows guest for name and login; and blank email. I am trying to find the cause of this error.

Does the 'guest' imply that the quiz taker is not logged into joomla at the time of submission?

Hello,

Probably these quizzes were completed by guest users.

Regards,
ARI Soft
