Some suggestions for future versions

Posted by victoriammt - 2016/08/07 18:34

_____

After spending most of the day adding questions, I would like to make the following suggestions to make the workflow for ariquiz users better.

1. When adding questions it would be super-helpful to have a "save and new" button, instead of having to hit Save/close and go back in.

2. Perhaps this is already a feature, but I can't find it - it would be great to be able to save default settings for quizzes and questions. E.g. 99% of my questions are worth 1 point, but I have to set this every time and sometimes forget (which is time consuming).

3. In the questions list, it would be really useful to be able to select and copy questions (like with Joomla articles/modules etc). Often I have similar questions but with only one small difference. This would be particularly useful for hotspot questions which have the same image but different questions, as it seems I have to start from scratch each time.

4. When using the text editor to add an image, placeholder text comes up saying "content". I have to delete this every single time. Once is fine, but when you do 20 image questions in a row, it gets really annoying. I think it's unnecessary to have it at all as anyone using Joomla will know it's a text area.

Thanks for your consideration.

_____

Hello,

Thank you for your suggestions. We will implement them in a future release. About suggestion #3, the extension supports ability to copy the selected questions. For this use "Copy" button on quiz questions page. This function is not available on "Question bank" page.

Regards,
ARI Soft
