
Enable user result or Categories on the left side

Posted by lionheart2308 - 2016/09/07 07:31

How do i enable the User result to be placed on the left side of the screen?

Also how to enable the categories of all quizzes on the left or right site of the screen (like in wordpress)?

thank you http://www.ari-soft.com/images/fbfiles/images/left_side_menu.png

Hello,

If you site template contains a module position at left side, assign a result module ("ARI Quiz User Results" for example) to this position. Module positions are defined in templates, not in components.

The extension doesn't contain a module which shows quiz categories. Currently they can are shown on "Quizzes" or "Quiz category" page only.

Regards,
ARI Soft
