
User results are not shown.

Posted by laelviana - 2016/09/12 18:53

Hello,

The results of the tests realizados user is not appearing. When I check the menu "user results" indicates "failure". I can not identify the error.

Hello,

Is it possible to see the problem anywhere?

Regards,
ARI Soft

These results are show by a module ("ARI Quiz User Results" or "ARI Quiz User Top Results" module). Check settings in "Menu assignment" tab on module settings page.
