## Change navigation page color

Posted by randitya.dewa - 2016/09/20 22:20

---

Dear experts,

I set the "show paging" parameter to yes. How to change the fill-color of the navigation page?

For example I want to change the fill-color of the page number where the question has been answered (or saved) to green. On the other hand, the unanswered question should have red color on the page number box. Moreover, the current page should be yellow.

Thanks.

Hello,

Add the following CSS rules to a site template CSS file:

```
#ariQuizContainer .aq-quizsession-container .pagination LI>A {background-color:red;}
#ariQuizContainer .aq-quizsession-container .pagination LI.active>A {background-color:yellow;}
#ariQuizContainer .aq-quizsession-container .pagination LI.disabled>A {background-color:green;}
```

Regards,  
ARI Soft
