_____

How can I add more user details when registering?
I need as mandatory fields the phone number and a selection for the prize (there are two prizes for the winners).

_____

Hello,

Custom fields can be added to /components/com_ariquiz/models/forms/quizform/guestform.xml file. We have sent the updated file with "Phone" and "Prize" fields by email. Check it please.

Regards,
ARI Soft

_____

The extension can show these data in text (mail, print, certificate templates).

We will provide a custom modification by email within 24 hours which will show extra data in quizzes results data grid.

Regards,
ARI Soft

_____

The update did not worked.
I just want to capture besides the name and the email, the phone number of the participant as well.

_____

I had a similar problem (needed to add phone number feature). In order not to bother the support, I changed "e-mail" field into "phone number" and somehow removed the requirements for the e-mail's right spelling. It's all fine for me (I get person's phone number which is considered "e-mail" by the quiz program) BUT a tiny problem. Sometimes people tend to forget to add one digit in their number. Could you help me to make the obligatory format look xxx-xxx-xx-xx where "x" is entered by client, dashes are obligatory and present. I guess, some minor changes needed in e-mail field settings, but it's too much for me. Could you give me a hint please?

_____

Hello,

Open /components/com_ariquiz/models/forms/quizform/guestform.xml file and replace the following code:

with the following one:

It changes validator rule for "Email" field. About showing dashes in textbox, it is not possible only with HTML and CSS, it requires to use javascript (for example jQuery plugin) and it is out of free support.

Regards,
ARI Soft
