Before Sales question

Posted by militos - 2016/09/22 09:02
_____

Hi,

I am interested in buying the extension but I have some questions before.

For registered users
1. Is it possible to save the progress of the quiz and continue some other moment ?
2. Is it possible to have points instead of %?
3. Is it possible to Disable a quiz if the user complete it for some amount of time ?

P.S.
I am willing to pay some extra for some extra features

Thank you

Hello,

Thank you for your interest in the extension. Regarding your questions:

1. It is possible to pause a quiz session and return to it later.

2. Absolute points are set in "Score" parameters in question settings. Percent is only used for secondary answers in "Single question" and "Multiple question" question types.

3. It is possible to set number of attempts for a quiz (and if necessary reset it after some days, weeks, months and etc.) or set delay before next attempt.

Regards,
ARI Soft

Thank you for your Answer.

1. Is saved in session ? not In database ? I need it to be saved in database and when the user logins from any other computer any other time, be able to continue the test exactly where he left it.

Thank you

_____

All results and quiz sessions (it is not a PHP session) are stored in a database. A user can login from any computer and get access to their quizzes results or continue paused quiz sessions.
