
Quiz - Question tempalte

Posted by militosconsulting - 2016/09/27 10:22

Hi,

I was asked to do different template of the quiz.
I have done it in html before I buy the extension following the customer's requests.
You can find it here : [http:// demo.clickonlogic.com/en/test](http://demo.clickonlogic.com/en/test)

The idea is :

1. Every page is an accordion
2. Every question is in a slider

There will be also a progress bar on top which will count the % of questions answered in all pages.
For example If I have 36 answers (12 per page) and answer 10 from page 1, 5 from page 2 and 3 from page 3 (18) it will be (50 %).

Can you please let me know which template files I should change in order to achieve this ?
Thank you
