
multiple Free Text Question

Posted by airs - 2016/09/30 10:21

Hello,

I am using Free "multiple Free Text Question" option for fill in the blanks but it is asking correct question and it has not any option to select right question.

Please let me know check screen shot.

<http://prntscr.com/co3z5i>

Thanks

Hello,

Read text in "Note" section please, it is described how to use this question type. It is necessary to specify a placeholder in "Placeholder" parameter and then use it in question text. For example if enter txt1 placeholder, use code in question text. It will be replaced with input box on frontend.

Regards,
ARI Soft

Please let me know how i can add these type of fill in the blanks

150. From the list of most 5 popular video sites pularity by placing numbers 1-5 (for example 1=Most Popular and 5=least popular amongst the top 5):

- | | |
|------------|-------|
| A. Hulu | _____ |
| B. iTunes | _____ |
| C. Yahoo | _____ |
| D. Bing | _____ |
| E. Youtube | _____ |

Answer

- A. 2
B. 4
C. 5
D. 3
E. 1

Hello,

If you want to provide ability to select several answers then use "Multiple Summing Question" question type.

If users should select only one answer then use "Single Question" question type, set "Score" parameter to 5 and mark "C" answer as correct, for "A" answer populate "%" parameter with 40 value, for "B" with 80%, "D" with 60 and for "E" with 20 value.
