
Upgrade only specific DP files

Posted by niki - 2016/11/06 00:29

Hi,

I want to extract from the Joomla 2.5 DB only the Quizzes attempts and the quizzes results. Can you tell me the name of this DB files?

I already have all the quizzes, categories, questions in Joomla 3. I only need to move the successful or fail quiz results and attempts to joomla 3 from Joomla 2.5 DB.

I don;t want to move everything because i already change some quiz settings on Joomla 3 and i don't want to change them again.

I know is Sunday but can you help me with this? The website is live and people can't see they old quiz results.

Thanks

Hello,

Results are stored in the following tables:

#__ariquizstatisticsinfo

#__ariquizstatistics

#__ariquizstatistics_pages

data from #__ariquizquestion and #__ariquizquestionversion are also used.

Regards,

ARI Soft

It seems DB data are corrupted. We need to see the problem and have access DB and backend to investigate this problem.

I import the DB again and now when i try to install ari quiz i got this error

Unknown column 'asset_id' in 'where clause' SQL=SELECT QuestionId FROM #__ariquizquestion WHERE QuizId > 0
AND asset_id = 0

I'm still haveing problem with this.

The step i take:

Extracting all of this:

#__ariquizstatisticsinfo

#__ariquizstatistics

#__ariquizstatistics_pages - This is missing in Joomla 2.5

data from #__ariquizquestion and #__ariquizquestionversion

And then importing them in Joomla 3 DB.

After that i try to install Ari- Quiz from Joomla extension installation and i got this error:

Warning

Unknown column 'asset_id' in 'where clause' SQL=SELECT QuestionId FROM #__ariquizquestion WHERE QuizId > 0
AND asset_id = 0

Error

Error installing component
