
Couple of questions

Posted by disoft01 - 2016/12/21 06:09

I'm new to the QUIZ component but I find it interesting.

-The calculator is not scientific. Is there any chance to get that functionality?

-The second question is about branching. Coming from the desktop apps, is there a way to link a question to another one?

How can I redirect the result page to another page?

Thank you again for this great product.

Hello,

1. Sorry, but the calculator supports only a simple mode.

2. The extension doesn't support this ability.

3. We sent "ARI Quiz Redirect" plugin by email.

Regards,

ARI Soft
