
Quiz mail result notificaction

Posted by sarcas28 - 2017/02/01 15:37

Hello,

I set a Quiz and i set it in Anonymus Access > NO and in tab Results Settings > Auto Email > Notification Email(s): pruebas@cÂ·Â·Â·.Â·Â·Â·.Â·Â· is set. User group is set to Super User only.

All work good but the quiz result (mail template) it sendd at all emails of registred users in Joomla.
The quiz resul (mail template) it sendd at 8 mails but i typed only one.

How to solve this?

Thank you a lot!

PD: sorry for my bad english.

Remove selection in "User group" parameter otherwise mail will be sent to all users from the selected group(s).

How do remove the selection because i ckicked in the Super User and he is now selected (only Super User is marked).
I ckicked in white section but don't unselected Super User.

Thank you!

Hold Ctrl (Command on iOS) button and click by option which want to remove. This is standard behaviour for drop-down list control in browsers.
