
Button at the end of a quiz

Posted by Marsm - 2017/02/02 08:09

Hi,

I need a button at the end of a quiz, which links to a specified url.
This link is different for each quiz.

Is it possible to make a button like this?

Regards,
Marsm

Hello,

You can add this button to text template and use different text template for each quiz and change url or we can add a new parameter to quiz settings where URL will be entered and button which will open this link will be shown on quiz results page. The second solution we can implement as a custom development. If you are interested in it, contact us by email and we will discuss details.
