
Ariquiz Anywhere Plugin Not Working

Posted by kumasewera - 2017/02/05 01:26

Hie there,

I installed the Quiz component and it's working like a charm. Today I installed the AriQuiz Anywhere plugin but somehow it doesn't work. I have enabled it and I am using the syntax as found in the documentation: {ariquizanywhere quizId="2" scrolling="auto" removeTitle="1"}{/ariquizanywhere} .

When I view the article in front end the code above is displayed exactly like that and no quiz is loaded.

Is there something I could be doing wrong?

Regards

=====
