Certificate download option is not working

Posted by airs - 2017/02/09 17:35

_____

Hello,

I am using ARI Quiz but after passed exam Download Certificate option is redirecting to exam results it is not downloading pdf Please suggest any setting.

http://prntscr.com/e6ma9i

Thanks

_____

Hello,

Could you provide a link to a page where the problem occurs?

Regards,
ARI Soft

_____

It seems template file for quiz complete page was modified and some important code was removed. Try to restore original template file.

Regards,
ARI Soft

Need to â€œrenameâ€• Downloaded results file
Posted by airs - 2017/02/22 11:12
_____

Thanks for the update.

One more question required i want to change download results files name

http://prntscr.com/eby4na

Need to â€œrenameâ€• Downloaded results file (â€œCertificateâ€• to â€œExam Resultâ€•)

Please let me know where i can change this file name.

Thanks

Add logo in downloaded pdf
Posted by airs - 2017/02/22 15:47
_____

Many Thanks

one more question i want to add my company logo in downloaded pdf results how i can add it please check screenshot.

http://prntscr.com/ec1sf1

Thanks

===

Re:Add logo in downloaded pdf
Posted by admin - 2017/02/22 21:05
_____

See "_generateCertificate" method in /components/com_ariquiz/controllers/quizcomplete.php file. The extension uses
DOMPDF PHP library to create PDF documents. You can modify code for your needs.

Regards,
ARI Soft

Re:Add logo in downloaded pdf

Posted by admin - 2017/02/27 11:10

_____

Replace the following code in /administrator/components/com_ariquiz/kernel/PDF/DOMPDF/dompdf_config.custom.inc.php file:

//define("DOMPDF_ENABLE_REMOTE", true);

with the following one:

define("DOMPDF_ENABLE_REMOTE", true);

and indicate the full URL to the image (like http://www.domain.com/photos/logo.jpg)

Regards,
ARI Soft

Re:Add logo in downloaded pdf

Posted by airs - 2017/02/28 04:54

_____

We have applied this thing

//define("DOMPDF_ENABLE_REMOTE", true);

with the following one:

define("DOMPDF_ENABLE_REMOTE", true);

and indicate the full URL to the image (like www.domain.com/photos/logo.jpg)

But i am not show exactly what have to do.

Please write down specific code so i will replace it with current one.

Thanks

_____

It is working fine on our test server. Could you provide a temporary access to your J! backend by email and a link to a quiz where the certificate is used so we can investigate the problem?

Regards,
ARI Soft
