Ari Quiz creates problem with some joomla templat

Posted by enginbasturk61 - 2017/02/21 10:48
_____

Hi!

I have a problem with with quiz and the template I used for my site. I tried another template but the problem was still there.

the problem is when I go to the quiz page (start a quiz) my right side or left side modules goes to the bottom of the website.

It occurs when only I am in quiz page... Not result page or any other page of ari quiz

please see the pictures I captured http://www.ari-soft.com/images/fbfiles/files/image_3.zip

Hello,

Could you provide a link to a page where the problem occurs?

Regards,
ARI Soft

This problem with HTML code on the page. It breaks site template layout. Check code which is used to add Ads. Probably it contains unnecessary
