
Auto submit if I leave

Posted by edwinfg - 2017/03/08 12:50

Hello,

the system does not auto submit in background when some one leave the Quiz and came later to finish but the time to get access (End date) is over?

I saw the instance in table ariquizstatisticsinfo over the database and the status is in progress but the Score is 0 and I was submit the first two questions well.

Hello,

It a user leaves a quiz (and don't click "Stop & Exit" button) and return to it when time is over then the quiz session will be completed and all answers which were not provided ("Save" button is pressed) will be ignored.

Regards,
ARI Soft

Hi Arisoft..

I have this situation as well.

I need to be able to use Joomla php code to call the routine that completes the exam and updates the statistics in _ariquizstatisticsinfo .

Where file is this routine stored in, and how would I call it, assuming I already have the StatisticsInfo variable handy ?

Thanks,
Pete

Hello,

When a quiz session is completed, the extension triggers "onEndQuiz" event. It is possible to create a plugin which will handle this event. We can send "ARI Quiz Redirect" plugin which work with this event. It can be used as a sample.

If want to place your code directly in "ARI Quiz", open /components/com_ariquiz/controllers/quizcomplete.php file and see code around the following line:

```
AriEventController::raiseEvent('onEndQuiz', $resultInfo);
```
