
Result link code to make custom link on my other p

Posted by airs - 2017/03/11 19:00

Hello,

I want to use result link code to make custom link on my other page. but I unable to check exact place where it is creating because it has id encrypted. So please provide me help.

<http://prntscr.com/eiqnk6>

Please check sreenshot.

Thanks

Hello,

I need to add result link in other component so how I can add this and which type of url I have to follow

like :

`index.php?option='`

`+ PAGE.option`

`+ '&view=quizresult&statisticsInfold='`

`+ sid`

`+ ''`

so I will get result id from database but I need to an static url

Please check and let me know.

Thanks

Hello,

URL to specific result page looks like:

`index.php?option=com_ariquiz&view=quizcomplete&ticketId=TICKETID`

Where TICKETID is an unique token for each result.

URL to page with all results of currently logged user is:

`index.php?option=com_ariquiz&view=quizresults`

Hello,

Can i use this link

`index.php?option=com_ariquiz&view=quizcomplete&ticketId=TICKETID`

and it will get results auto for every finish the quiz and for every user?

Please let me know.

Thanks

It is necessary to replaced TICKETID with ticket ID of result which you need. Something like this:

`index.php?option=com_ariquiz&view=quizcomplete&ticketId=abcdds345345345`
