
Get quizzes in the same category

Posted by militosconsulting - 2017/03/17 11:56

Hi,

I have a custom results module and I am trying to get all the quizzes that are under the same category.

So I have my SQL statement, I have the category ID but there is no field in the "arquiz" table for the category.

How can I do it ?

Thank you

Ok, I found it.

I was looking in table "arquizcategory" and the correct table is "arquizquizcategory"

Thank you
