## Quiz Link

Posted by enginbasturk61 - 2017/03/28 18:58

---

Is it possible to show quizzes in quiz category list with different colors.

If a user failed in a quiz it can be red, if passed then green if not taken yet then black

So the user can know from a huge list which finished and which not...

---

I have read that post.

I have checked "Category" Page

```
if (is_null($passed))
    $quizClass = 'aq-quiz-link-nottry';
else if ($passed == '1')
    $quizClass = 'aq-quiz-link-passed';
else
    $quizClass = 'aq-quiz-link-notpassed';
}
```

It has these functions.

But why does it not work for me... I have 30 quizzes in a category and I passed some of them and fail some of them... All the quiz links in list are same...

I need help

I have checked it for latest version of the extension.

I have created 3 quizzes and as register user I have tried.. The link in categories are just the same. Nothing changed..

Do you have this implement in action (demo)

Does this implement get effected by site template..

Or what can be the problem?

Could you provide a link to a page where test it and a temporary access to your J! backend by email so we can investigate the problem?

Check your mail please. CSS classes are added to the links on your site.
