
Lock further quizzes

Posted by enginbasturk61 - 2017/03/29 10:44

Hi!

I have noticed that when we set access to a quiz depend on previous quiz, then the users suffers a bit..

For instance: If there are 30 quizzes in a category and each quiz depends to previous quiz. There will be a big chain.

if a user completed first quiz, according to the rule he should start second quiz. But sometimes they jump to the a further quiz like 28th quiz

Then they see and error

You don't have access to the quiz because haven't completed successfully the previous quiz.

when they click on the link provided they see same error with a different link of quiz.

So they have to click on that link (they dont need but) until they reach the second quiz.

Can we lock the quizzes until they finish the previous quiz succefully

when a user clicks a quiz which is not the succeeding one then there should be a pop up error...

=====

Hello,

Thank you. We will take your suggestion into account.

Regards,
ARI Soft
