## Show Page Heading not displayed

Posted by stepan39 - 2017/04/14 07:22

---

Good day!

A menu is created that displays a list of all available quizzes. In the menu settings - Show Page Heading. On the site - is not displayed. Help solve this problem.

Hello,

If want to show a custom page heading which is defined in "Page Display -> Page Heading" parameter in menu item settings then open /components/com\_ariquiz/views/quizzes/tmpl/default.php file and add the following code before code:

Regards,  
ARI Soft

Thanks, its works!  
This should be in the current release
