Hello!

Created new output:

\\administrator\\components\\com_ariquiz\\views\\oblcategories\\view.html.php

But you need to replace the column formatting

Now:

```
new AriDataTableControlColumn(  
    array(  
        'key' => 'CategoryName',  
        'label' => JText::_('COM_ARIQUIZ_LABEL_NAME'),  
        'sortable' => true,  
        'formatter' => 'YAHOO.ARIsoft.Quiz.formatters.formatBankCategory'  
    )  
),
```

Necessary

'formatter' => 'YAHOO.ARIsoft.Quiz.formatters.formatOblCategory'

How to make your column formatting?

This formatting is specified here \\components\\com_ariquiz\\assets\\js\\ari.quiz.js

This file is packed...

How to expand it?
