
Template for Time Limit

Posted by stepan39 - 2017/04/18 21:12

Hello!

To output the results after passing the task, I use the results scale. Depending on the number of selected points, a certain text template is displayed to the user.

Faced such a problem - I do not know how to set up a text template for an event when the client did not keep within the allotted time.

Is there a solution?

Thank you.

Hello,

The extension doesn't support this ability.

Thanks for the reply.

It turns out that the declared function of time limitation in the passage of the task is absolutely useless.

Imagine the situation when the user passes the task of 20 questions and does not fit into the limit:
A result message is displayed depending on the points scored on the previously scaled result scale.

I would not understand why I went through a paid test of 20 questions, but on the 5th question the result is already output, and the result is poor (it is clear that only 5 points out of the possible 20 are taken into account).

In any case, this is a clear flaw in the developers of the component... :(

We will take your suggestion into account and implement a plugin which will redirect to the selected page when time limit is over.
