
Setting questions and quizzes by default

Posted by stepan39 - 2017/04/19 10:33

Hello!

What changes need to be made to the code so that by default, when creating any questions, such values are set?

Hello,

For example if want to change default value for "Score" parameter on question settings page, open /administrator/components/com_ariquiz/tables/questionversion.php file and replace the following code:

```
var $Score = 0;
```

with the following one:

```
var $Score = 1;
```

Regards,
ARI Soft

Thanks, its work.

And how to put a check mark by default on Random Order? (Pic.2)

Open /administrator/components/com_ariquiz/kernel/Application/ARIQuiz/Questions/Types/class.SingleQuestion.php file, find "getExtraDataFromXml" method and replace the following code:

```
$data = array('randomizeOrder' => false, 'view' => 0);
```

with the following one:

```
$data = array('randomizeOrder' => true, 'view' => 0);
```
