Pagination of results

Posted by evga99 - 2017/04/20 14:58

_____

How I can disable pagination on result quiz page?
I would like to hide pagination menu , but default it display only 10 records. I need ALL records. If you add jQuery in future it wil be very good.

_____

Hello,

Do you mean results on backend, results at the end of a quiz or results of passed quizzes on frontend?

Regards,
ARI Soft

_____

Open /components/com_ariquiz/controllers/quizresults.php file and replace the following code (approximately line #55):

'limit' => 10,

with the following one:

'limit' => 9999,

and add the following CSS rule to a site template CSS file:

BODY #dtQuizzesResults_pag {display:none;}
