
Print button

Posted by Vantage - 2017/04/28 06:11

Is it possible to have a print button on the administration results page? http://www.ari-soft.com/images/fbfiles/images/Print_button.jpg

Hello,

Currently the extension doesn't support this ability. The results can be exported to one of selected format and then be printed.

Regards,
ARI Soft

When I export to Word or HTML I need to be able to report a users answer along with the question, at the moment it does not allow this, any ideas?

Then currently is only possible to open result details page and print web page (via browser's print dialog).

In that case is it possible to have the user details appear at the top of the result details page?

We are going to add this feature in a future version of the extension (suppose it will be in "ARI Quiz" v. 4.x), but if you need this urgently, we can implement it as a custom feature. If you are interested in it, contact us by email and we will discuss details.

Regards,
ARI Soft
