
CB Page results now incompatible

Posted by fredc15 - 2017/05/07 16:53

Hi,

The Community Builder page results tab is now incompatible with the latest version. Have you guys updated the plugin? Any plans to update soon??

Thanks

Hello,

Is it really don't work or it works, but a warning message about compatibility is shown by CB on backend?

Regards,
ARI Soft

In addition, download the plugin again please. It should work fine without warning messages.

Regards,
ARI Soft
