
Free text question error with php 7

Posted by Marsm - 2017/05/08 20:23

Hi,

when I set my site to php 7, the free text questions are giving an error. All other questions are fine.

See example here

You can also see some missing or invisible text. This happened after updating to Joomla 3.7.

Can you help me solving these problems?

Hello,

Could you provide a temporary access to your J! backend by email so we can investigate the problem?

Regards,
ARI Soft
