
User details on the results page

Posted by VantageAutomotive - 2017/05/18 00:36

On "quizzes results" there is a table which shows user details along with the result of their test.

Where is this information taken from?

There is a column labelled Login with every user showing as guest, is it possible to show their Joomla user group instead?

Thanks

Hello,

Do you mean the table which is implemented as a custom feature? If yes, data is retrieved in /administrator/components/com_ariquiz/views/quizresult/view.html.php file. See the following code in "getSummary" method:

```
'UserName' => 'Guest'
```

'Guest' can be replaced with any another value.

This is the table that I was referring to, I would like if possible to replace the "Login" column with the user group info...

It requires modification of the extension.

Thanks for the email.

When print the green ticks ad red crosses in the image below do not appear on the paper but look good on screen, should these print out?

Usually browsers are configured to not print background images by default. You can read here how to configure it in different browser's.

Thanks for the update.

This has made an improvement but still does not print the ticks and crosses.

Regards,

It looks like a problem with site template styles. Try to replace the following code in /administrator/components/com_ariquiz/assets/css/styles.css file:

```
.aq-quiz-result #dtQuestions .icon-ban-circle {  
    background: transparent url(../../../../../components/com_ariquiz/assets/images/publish_x.png) center center no-repeat;  
}
```

```
.aq-quiz-result #dtQuestions .icon-ok {  
    background: transparent url(../../../../../components/com_ariquiz/assets/images/tick.png) center center no-repeat;  
}
```

with the following one:

```
.aq-quiz-result #dtQuestions .icon-ban-circle {  
    background: transparent url(../../../../../components/com_ariquiz/assets/images/publish_x.png) center center no-repeat  
    !important;  
}
```

```
.aq-quiz-result #dtQuestions .icon-ok {  
    background: transparent url(../../../../../components/com_ariquiz/assets/images/tick.png) center center no-repeat  
    !important;  
}
```

Hi,
Changed the code, still the same.

Regards,

Try to clean browser's cache. If it doesn't help, could you provide a temporary access to your J! backend by email (need access to "Quizzes Results" page) so we can investigate the problem?
