
Errors when using the Terminate button

Posted by stepan39 - 2017/05/18 14:40

Hi!

In the quiz settings, you should use the button to Terminate.

Encouraged the following errors:

1. If SEF is enabled in global settings.

There is no message that the test will be interrupted. - BUG

When the button is pressed, it moves to the beginning of the task. - Good

2. If SEF is disabled in global settings.

A message appears that the test will be interrupted. Yes/No - Good

When you press any button, it flips to the page specified in the global settings for errors - BUG

How can this be solved?

P.S. This can be checked on your demo

Hello,

We can't reproduce the problem. When the button is pressed, the page with "Yes" / "No" buttons for "Take quiz again" action is shown. When "Yes" button is pressed, quiz description page is loaded otherwise will be load page which is defined in "Redirect URL" parameter on "ARI Quiz -> Config" page. It works in this way also on demo site.

If it works in another way on your site, could you provide a link to a quiz where the problem occurs and a temporary access to your J! backend by email so we can investigate it?

Regards,
ARI Soft
