_____

yes, color font-size and font-weight, if we change it in style.css like
#ariQuizContainer .aq-question-content {
font-size: 16px;
font-weight: strong;
 color: #000080;
 padding: 2px 0 0 90px;
 line-height: 1.2em;
}

it changes only for new questions, can we apply it on questions already in bank?

Try to use the following CSS rule:

```
#ariQuizContainer .aq-question-content {
  padding: 2px 0 0 90px;
  line-height: 1.2em;
}

#ariQuizContainer .aq-question-content,
#ariQuizContainer .aq-question-content * {
  font-size: 16px;
  font-weight: 900;
  color: #000080;
}
```

If it doesn't help could you provide a link to a quiz with questions where styles are not changed so we can investigate the problem (it can be a conflict with site template styles)?

ARI Soft
