Hello,

Read the first question and answer on F.A.Q. tab on this page please.

Regards,
ARI Soft

Thanks for your speedy reply. However, I am still having a problem. I can play the video in the setting of an article, no problems. But when I use the same syntax - {flv}name{/flv} - in the setting of an Ari quiz question (assuring you that I also tick the "parse plugin tag" box for that Quiz), I get {flv}name{/flv} as an output in the question, but no video!

I have tried different ways. No success thus far. Any help??

Could you provide temporary access to your Joomla! backend by email and say the quiz where we can see this issue that we can investigate it?

Try now, please. This problem occurred because old version of 'ARI Smart Content: News Pack' was installed on your site.
