
Parse Plugin Tags on Answer Area

Posted by myfatebiz - 2017/07/09 05:44

Hi,

Is that possible to make plugin working on answer area?. I willing to pay for custom code.

Best Regards

Mr.Fate

Hello,

Do you need it for specific question type(s) (for example only for "Single Question" or "Multiple Question" types) or for all question types?

PS: Could you send your order number by email.

Regards,

ARI Soft

I think i lost it because i not remember which email address i use to buy the extensions. That few years ago i guess. I using version 3.8.1 on Joomla 3.4. Do i need to re-buy again?.

Hi,

I not sure you receive email from me or not where i already made a payment for custom code at date JULY 15 2017.

Best Regards,
Mr.Fate

Dear AriTeam,

I tested the modification version and it's only working on frontend. At the backend not working.

Regards,
Mr.Fate

Re:Parse Plugin Tags on Answer Area

Posted by admin - 2017/08/22 14:37

Hello,

It works the same in standard version of the extension. Plugins are executed only on frontend part because content plugins are used in Joomla! only on frontend.

Regards,
ARI Soft
