Re:Parse Plugin Tags At Explanation Area

Posted by myfatebiz - 2017/08/28 17:39

Dear AriTeam,

I received and it's working now at explanation area but plugin parse not working on answer area under review section after save.

Conclusion is: Parse Plugin Tags:

- While user answering the test (Working).
- At Review section after user click save button (Parse plugin tags not working answer area).
- Result section (Working).

Regards,
Mr.Fate

Re:Parse Plugin Tags At Explanation Area

Posted by stepan39 - 2017/10/20 09:04

Hi!
What changes need to be made to the code so that I have plugins work on Explanation and Description Area?

I do not just update the component, he made a huge number of custom changes.

Thanks.

Sorry, but I do not quite understand your answer. In order for me to earn these functions, should I buy another version (my subscription is still active)?

I'm just asking you to tell me the changes in the code so that the joomla plugins work:

1. In the description of the quiz
 2. In Explanation Area

Hi AriTeam,

I just notice that AriQuiz new version come out v3.9.12

My custom code current versions is com_ariquiz_v3.9.11

Can you send me the latest package please or it would be easier if put at download section under member area.

Many Thanks

Regards,
MrFate

Re:Parse Plugin Tags At Explanation Area

Posted by admin - 2017/10/21 07:57

Hello,

to myfatebiz: Sorry, but we don't update custom versions of the plugin when a standard version is updated. About v. 3.9.12, it contains fix for "Multiple Free Text" question to handle "0" as answer correctly. You can update your version manually. For this download "ARI Quiz" v. 3.9.12 from "Member Area" on our site and copy backend/kernel/Application/ARIQuiz/Questions/Types/class.MultipleFreeTextQuestion.php file from com_ariquiz.zip archive to /administrator/components/com_ariquizkernel/Application/ARIQuiz/Questions/Types/ folder on your server.

to stepan39: it is not a feature of standard version. We developed it as a custom modification for myfatebiz.

Regards,
ARI Soft

to stepan39: it is not a feature of standard version. We developed it as a custom modification for myfatebiz.

I have a version "ARI Quiz" v. 3.9.8, in member area ARI Quiz v. 3.9.12
I need to know for sure if I need to dig into the code, maybe there are very minor changes.

Can you publish changelogs from version to version?
