
Hide correct answer not working.

Posted by myfatebiz - 2017/08/17 06:45

Dear AriTeam,

After i set "Hide correct answers" to yes at Result settings tab, the correct answer still showing.

Regards,
Mr.Fate

Hello,

We can't reproduce the problem on our test server. Could you send a link to a quiz where the problem occurs and if possible provide a temporary access to your J! backend by email so we can check quiz settings?

Regards,
ARI Soft

Sorry, i misunderstood what "Hide correct answers" use for. I though it's gonna hide all correct answer including question area.

Regards,
Mr.Fate

If you want totally hide correctly answered questions, set "Successful results" and "Failed results" parameters on "Results settings" tab to "Only wrong answers".

Regards,
ARI Soft
