
Ari Quiz integration with 3rd party components

Posted by niki - 2017/10/03 17:10

Hi,

Do you have any other integration with 3rd party Membership components? You have OSE Membership but do you have <https://extensions.joomla.org/extension/payplans/> integration?

A lot of people will start switching from OSE because they component is a mess after every Joomla update and they extension is unpublished from Joomla Store.

Hello,

Sorry, but currently the extension doesn't support integration with PayPlans extension.

Regards,
ARI Soft

How difficult will be to develop a plugin for PayPlans? Do we need PayPlans to help for developing? My point is i can pay someone to develop this but do you have any guides for 3rd party developers?

Did you help in developing the Ari Quiz addon for OSE or they did it themselves?

Thanks

=====

Sorry, but currently we can't help with custom development. OSE implements integration themselves.
