Wierd error...
Posted by myfatebiz - 2017/12/29 15:47

_____

Hi,

My Ari quiz appear this error on first page quiz before start.

TypeError: YAHOO.ARISoft.validators.validatorManager.addValidator(...) is not a function

Conflict with another module.

How to solve this?...

Thanks

Regards,
MyFateBiz

_____

Hello,

It seems like a problem with 3rd party plugin. Probably it is a plugin which is used to minify javascript files. We can investigate this problem in more details if you provide a link to a page where it occurs and a temporary access to your J! backend by email.

Regards,
ARI Soft
