## Help - Live results or statistics on Save&Exit

Posted by NilsT - 2018/01/13 09:25

---

Hello to all!

I'd like to implement a function that either allows the user to see a live statistic (something like: Total Questions; % answered; (%) correct; (%) wrong) or at least a possibility to get this when saving&exiting the quiz.

Since my coding-abilities are now near rock-bottom, I'd be very grateful if someone can help me by providing any ideas on which variables to fetch oder how to possibly realise this.

Thanks in advance for any help!!

P.S.: Any roadmap when 4.0 will be released?

Hello,

The extensions saves data about quiz sessions to #\_\_ariquizstatisticsinfo and #\_\_ariquizstatistics DB tables. These data can be used to get live statistics.

Regards,  
ARI Soft
