
Free text question

Posted by Marsm - 2018/02/02 09:39

Hi,

for some of my quizzes with Free text questions it would be an improvement, for laptop and pc, if the cursor is in the text area, together with the text 'Enter your text here'. It would also be an improvement if you can press Enter on the keyboard instead of clicking Save.

Can you make this? Or can you implement this in a new version, perhaps v.4.0?

Regards

=====
