
How can by?

Posted by Mira - 2018/02/14 14:52

Hello! I want to by ARI Quiz.

But, I don't now how can do it.

I want to know is there any support from anyone, and whether it is possible to test the paid version before purchase.

Thank you for help.

Hello,

Check your mail please we sent the direct link to a payment page.

You can try the extension in action on demo site.

Regards,

ARI Soft

Thanks, but demo site is't suitable for testing.

I need to check whether he will give me.

I'm interested in the results. In the Ari Quiz Lite version, unfortunately, there is no information, if have in one question there are 8 answers and 5 of them are correct, then the output of the results doesn't take into account all these 5 points if you allow 1 error, i.e. from 5 correct to choose only 4.

Sorry for my english, I hope, I could explain what I want.

Hello,

Do you want to set score for each answer separately? For example 1 point for answer 1, 3 points for answer 2, 4 points for answer 3 and 0 points for answer 4 and if user selects several answer calculate sum of points? For example if select answer 1 and answer 3 then earns 5 points?

Regards,

ARI Soft

No :blink:

I hate my english :)

I have 1 question, in this question have 8 answers, where just 5 correct.
And when I pass the test I can only choose 4 correct answers. Let's say the other questions answered correctly.
In total, the test is 28 points, if you allow 1 error, I mean in one question to indicate all 4 correct answers, then the result should output 27 points.
But know, my Ari quiz lite show me 23 points, because he generally doesn't take into account this question, where there are 4 correct out of 5, and I need to show me 27 points.

So I wanted to buy ARI Quiz.
Because I thought that there will be this kind of output of the results :(
