## Multiple scores for questions with Radio buttons ?

Posted by meez - 2008/12/09 11:59

---

Hello Arisoft team,

is there a way of having 1 question with (for example) 4 answers. then every answer has it's own value/percentage (this is possible now in version 2.2.0) but then the user can only select one (radio)button, instead of having selectboxes ??

It looks something like this:

Question 1

- Answer one
- Answer two
- Answer three
- Answer four

Question 2

- Answer one
- Answer two
- Answer three
- Answer four

etc

Kind Regards,

Meez

Certainly this is possible.

You can select to display answers in Single Question as drop down list or radio button list. Just set "View Type" option in quiz as "Radio button list" and answers will be displayed as you describe.

Ok but my questions have sometimes 5 answers, sometimes 4 answers and sometimes 3 answers.

The points are always like this:

Answer one  
Answer two  
Answer three  
Answer Four  
Answer Vive

The 'Correct' answer get's automaticly 100% but if i have only (for example) 3 answers i should have something this:

Answer one  
Answer two  
Answer three

thanks.

regards,

Meez

In current functionality there is no possibility NOT to select correct answer. We don't see any sense when all answers are wrong.

We would propose for you situation to enter values:

Answer one  
Answer two  
Answer three

If you could describe the situation when it's suitable NOT to have any correct answer we would think about this - probably this would make sense to implement such functionality sometime in future.

Maybe you have a suggestion. I have to realise the following test(i bought and installed already Arisoft Quizz):

---

There are 8 questions with the following answers and points:

Question 1:

- Answer one
- Answer two
- Answer three
- Answer four
- Answer five

Question 2:

- Answer one
- Answer two
- Answer three

Question 3:

- Answer one
- Answer two
- Answer three

Question 4:

- Answer one
- Answer two
- Answer three

Question 5:

- Answer one
- Answer two
- Answer three

Question 6:

- Answer one
- Answer two
- Answer three
- Answer four
- Answer five

Question 7:

- Answer one
- Answer two
- Answer three
- Answer four
- Answer five

Question 8:

- Answer one
- Answer two
- Answer three

-----

The result is divided in 3 parts:

- Result 1 - 0-8 points
- Result 2 - 9-12 points
- Result 3 - More than 12 points

-----

---

The arisoft quizz is working with percentage(%) is it possible to translate it into points?

It's a 'medical' test and it's very important i can keep this counting.

Do you have any suggestions?

thanks.

kind regards,

Mees Frenkel Frank

Probably this will suit in your situation:

Question 1:

Score = 4

-Answer one 0%

-Answer two 25%

-Answer three 50%

-Answer four 75%

-Answer five 100%(Correct)

Question 2:

Score = 2

-Answer one 0%

-Answer two 50%

-Answer three 100%

and so on.

We plan to add converter points-to-percents for convenience in next release.

Regards,

ARI Soft

thanks alot for the support.

For the Result scale. In my case there are 3 score types:

- From 0-8 points, here comes text
- From 9-12 points, here comes text
- 12 and more points, here comes text

There are 8 questions. The max. score is 22 points. In the Result scale i have to 'translate' it into percentage (?) But for example 9 points (From 9-12 points) is 24.444444%

Do you have any suggestion?

thanks.

Probably the most correct solution is to set up for 9-12 points percentages: 41%-55%.

$9/22 = 40,9\%$  (41%)  
 $12/22 = 54,54\%$  (55%)
