Importing Questions

Posted by nsujoy - 2010/08/11 15:18

_____

I need help in importing questions using .csv files but i want the format to be intact.

1) how to export questions using indentation, formatting etc. (like bold font et.al.). Like asking question based on C snippet.

2) how to insert special characters in a question's answer option like Degree for Celsius or Fahrenheit. I could not change formatting for the answer choices.

3) how to insert picture / sketches / schematic diagrams in a question (and answer)

Please help

_____

Hello,

Regarding your questions, you can use HTML code in answers. For example if you want to create bold text, wrap it with and tags.

Regards,
ARI Soft
