## Question Count is not correct

Posted by nsujoy - 2010/08/11 15:55

---

I created a quiz in which there are 10 questions, at the end of quiz the result is showing out of 9 questions, it is showing one question less. But it is showing answers for 10 questions.

### Quiz Result

Result : 4 / 9

Percentage : 44.44 %

Passed : Not Passed

Start Date : 2010-08-11 15:29:12

End Date : 2010-08-11 15:30:53

Spent Time : 1 min 41 sec

Passed Percentage : 50.00 %

After the result section it shows all the 10 questions, What could have gone wrong possibly?

Please let me know if you need administrator access.

Hello,

Could you provide your order number and temporary access to your Joomla! backend by email that we can investigate this issue?

Regards,  
ARI Soft
