Exclude autocompletion

Posted by danp - 2018/03/28 11:38

_____

Hello,

Is it possible to intervene from the software settings to exclude the autocompletion in the "free text" quizzes, even if the brower is set to allow it?

Thank you http://www.ari-soft.com/images/fbfiles/images/Schermata_2018_03_28_alle_13.png

_____

Hello,

Could you specify browser(s) where the problem occurs? autocomplete="off" attribute is used on textbox.

Regards,
ARI Soft

_____

Hello,

The problem occurs in Chrome 58.0.3029.110 for Mac and in Firefox 52.0.2 for Mac (attached). It does not occur in Safari.

I have not tested any other browsers.

Regards,

Daniele http://www.ari-soft.com/images/fbfiles/images/firefox_50_0_2_mac.png

_____

We checked it in Google Chrome v. 65.0.3325.181 on Mac and can't reproduce this problem.

_____

I reproduced the problem in mac mini, macbook pro and macbook air.
I enclose a new screenshot showing the "suggestion".
I confirm that it also occurs in Firefox.
I add that the problem also occurs in Edge for Windows (just tested).
How do you explain?
Is it possible for me to intervene in some Ariquiz setting?
Thank you http://www.ari-soft.com/images/fbfiles/images/ariquiz-f4977ef3b153b1e5aaa57fb86519dd71.png

_____

I want to be clearer:
it is obvious that the "suggestion" appears after the field has been filled in previously, on the same computer and in the same browser.
I would like to make sure that this does not happen.

_____

Could you provide a link to a quiz where the problem occurs?

Regards,
ARI Soft

_____

The problem occurs in all quizzes with questions like "free text" or "multiple free text".
An example here:
https://verifiche.danielepriori.it/unita-di-misura.html
You must log in with the following credentials:
user: guest
password: ariquiz
After having filled in at least one field and saved, re-enter in the quiz: the suggestions will be shown in the fields previously filled in and saved.

Thanks for your help

Regards,
Daniele http://www.ari-soft.com/images/fbfiles/images/chrome_mac.png

_____

We understand the problem. It occurs with multiple free text questions, not with simple free text. Download and upgrade the component to v. 3.9.16. It should help.

Regards,
ARI Soft
